The global anti-inflammatory market size is expected to reach USD 191.42 billion by 2027 on account of increasing investments on the development of biologics for treating autoimmune inflammatory diseases. Anti-inflammatory drugs help to reduce inflammation in the body and treat health conditions such as arthritis, asthma, rheumatoid arthritis, sinusitis, and others. A recently published report by Fortune Business Insights offers a comprehensive overview of the market and its prime growth trajectories. As per the report titled, "Anti-Inflammatory Drugs Market Size, Share & Industry Analysis, By Drug Class (Anti-inflammatory Biologics, Non-steroidal Anti-inflammatory Drugs (NSAIDs), Corticosteroids), By Application (Autoimmune Inflammatory Diseases (Rheumatoid Arthritis Psoriasis, and Others), Respiratory Diseases, and Others), By Route of Administration (Oral, Injection, Inhalation, and Topical), By Distribution Channel (Hospital Pharmacy, Retail Pharmacy, and Online Pharmacy), and Regional Forecast, 2020-2027," the value of the market was USD 93.88 billion in 2019 and is expected to rise at a CAGR of 9.3% between 2020 to 2027.

The report provides market analysis to give a broader overview of the key players in the market. In addition, the report also covers key strategic developments of the market including acquisitions & mergers, new product & service launches, agreements, partnerships, collaborations & joint ventures, research & development, and regional expansion of major participants involved in the market on a global and regional basis.

Key Features of Anti-Inflammatory Drugs Market Report:

- Overview, Industry Life Cycle Analysis, Supply Chain Analysis
- Size, Trends, Growth Drivers, Constraints, SWOT Analysis, Forecast Analysis
- Competitive Landscapes: Market Share, Product Portfolio, New Product Launches, etc.
- Market attractiveness and Associated Growth Opportunities
- Strategic Growth Opportunities for the Existing and New Players
- Key Success Factors

What are the Objectives of the Report?

The report offers a comprehensive overview of the market and its growth parameters such as drivers, restraints, challenges, and upcoming opportunities. The report also offers interesting insights into the market, current trends, and significant industry developments. It also throws light on key players functioning in the market and the key strategies adopted by them to compete for the top position. The report further discusses the segmentation of the market based on factors such as drug-class, application, route of administration, distribution channel, and geography, and lists the names of the leading segment with attributed factors. The report offers an overall qualitative and quantitative analysis of the market and is available for sale on the company website.

Key Companies and Manufacturers Covered:

- Novartis AG
- AbbVie Inc.
- Biogen
- Merck & Co., Inc.
- Amgen Inc.
- Bristol-Myers Squibb Company
- Eli Lilly and Company
- Johnson & Johnson Services, Inc.
- GlaxoSmithKline plc.
- Pfizer Inc.
- Other Players

An Overview of the Impact of COVID-19 on this Market:

The emergence of COVID-19 has brought the world to a standstill. We understand that this health crisis has brought an unprecedented impact on businesses across industries. However, this, too, shall pass.

Rising support from governments and several companies can help in the fight against this highly contagious disease. Some industries are struggling, and some are thriving. Overall, almost every sector is anticipated to be impacted by the pandemic.

We are making continuous efforts to help your business sustain and grow during COVID-19 pandemics. Based on our experience and expertise, we will offer you an impact analysis of corona virus outbreak across industries to help you prepare for the future.

Increasing Prevalence of Inflammatory Diseases will Add Impetus to Market

The increasing prevalence of inflammatory diseases namely ulcerative colitis, inflammatory bowel, psoriasis, and rheumatoid arthritis, and others are the major anti-inflammatory drugs market growth driver. As per the Centers for Disease Control and Prevention, an estimate of 78 million people in the U.S. will be diagnosed with arthritis by the end of 2040. Apart from this, the increasing uptake of corticosteroids for treating chronic obstructive pulmonary diseases (COPD) and asthma, coupled with the increasing prevalence of atopic dermatitis are likely to aid in the expansion of the market in the long run.

On the contrary, the side effects of using non-steroids anti-inflammatory drugs or NSAIDs such as dizziness, allergic reactions, stomach pain, stomach ulcers, and others may pose a major threat to the market in the coming years. This, coupled with the risk of gastrointestinal bleeding and other complications may hinder the market in the coming years.
